<https://www.bbc.com/future/article/20190523-does-reading-fiction-make-us-better-people>

Questions :

- 1) Give an account of the article in five sentences maximum : explain what it is about and which conclusion it comes to. In order to do this résumé, highlight five to eight sentences you consider to be the most important in the article.
- 2) Focus on the following description of one of the experiments which was led and get ready to explain it, in your own words, to the class.

At the Princeton Social Neuroscience Lab, psychologist Diana Tamir has demonstrated that [people who often read fiction have better social cognition](#). In other words, they're more skilled at working out what other people are thinking and feeling. Using brain scans, she has found that while reading fiction, there is more activity in parts of the default mode network of the brain that are involved in simulating what other people are thinking.
